Your Smart Vending Solution

Elysium is a 3-in-1 system that integrates telemetry, payments, and an interactive display in a single upgrade. Its touchscreen improves user interaction, while compatibility with MyKey, mobile applications, and credit card payments offers flexible transaction options.

Designed for efficient vending management, Elysium allows remote updates for firmware, pricing, and alarms. It also supports the connection of any peripheral for cash recognition, ensuring a fully adaptable payment system.

Smart vending made simple. Control your fleet remotely and offer seamless payments—all with Elysium.
