Creos

Reliable and Secure Banknote Reader

Creos ensures precise, fraud-resistant banknote validation, making it ideal for high-traffic vending locations where reliability is key. Its nine optical sensors enhance counterfeit detection, reducing losses and ensuring secure transactions. The polycarbonate bezel and optimized alignment system guarantee smooth banknote insertion, improving user experience. USB-based updates allow fast on-site programming.

Built for Security

Creos includes an anti-fishing system, cashbox sensor, and liquid drainage for added protection.

Flexible Installation Options

Creos installs with the stacker up or down, with either the full bezel or just the insertion slot exposed.

Free database

Coges provides all necessary software for programming and updates, including a customizable banknote database.

Creos delivers fast, secure banknote validation, ensuring reliable cash handling for vending operators.

Precision and Security in Every Transaction

Creos helps vending operators streamline cash management with fast and precise banknote validation, reducing transaction errors and counterfeit acceptance.
When integrated with Coges Engine, Creos provides detailed transaction tracking, offering greater control over sales and cash flow while reducing operational downtime.

All sales transactions are recorded in a format ready for export and analysis to optimize your business intelligence.
