

# Engine Connect

The ultimate cashless payment system for full vending machine control

Connect. Pay. Simplify.

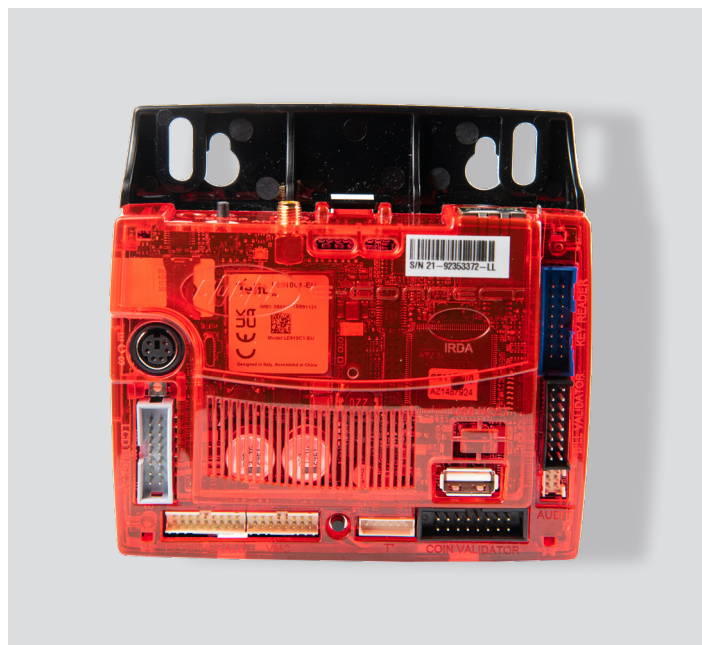

coges

## Engine Connect

# The most complete cashless payment system

To increase the value and efficiency of your vending machine, the Engine Connect system combines cashless payment with cash management and connectivity.

Engine Connect can connect directly to the Cloud and to remote peripherals, such as credit card readers, without requiring routers or additional hardware.

### Multistandard payment system

Executive, MDB and RS232 protocols all in a single payment system

### Choose the media you need

Available in MyKey, MIFARE and LEGIC versions with dedicated readers

### Embedded full-speed telemetry

Choose the 4G or 4G + LAN version for connection to credit card readers

## All the functions you need for worry-free vending machine management

### Vending

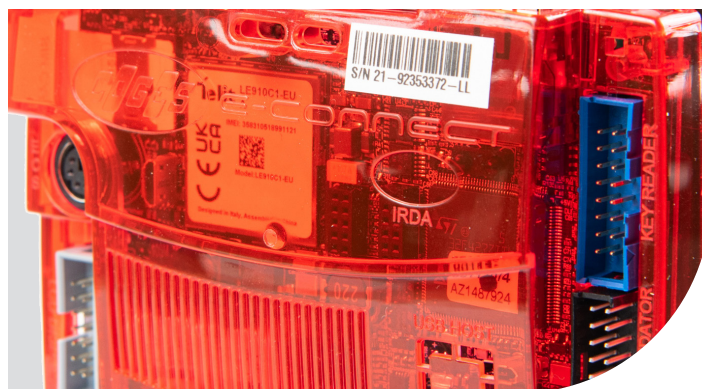

200 price lines  
4 media tables  
OTA updates  
EVA-DTS data audit

### Loyalty

Top-up and free sales bonuses  
Eco-recycling  
Meal vouchers

### Security

Lock-ID  
Blacklist  
Transactions recording  
Encrypted communications

## Which kind of cashless do you have?

Choose the closed-loop cashless reader that best suit your needs and increase the value of your vending machine. All models are ready to connect to a credit card reader and can be equipped with a Bluetooth expansion module for additional functionality.

### MyKey - MIFARE - LEGIC

Depending on the reader, Engine Connect support MyKey, MIFARE Classic and DESFire or LEGIC media.

### Credit card

Thanks to integrated connectivity, Engine Connect supports contactless or chip credit card readers.

### Mobile

Engine Connect handles smartphone payments with the Pay4Vend app or third-party apps.

## Increase your sales chances

An always-connected payment system guarantees you the possibility of offering your users the payment option that best suits their needs and the type of point of sale: from cashless closed-loop to credit card, from cash to smartphone, you will no longer risk losing revenue due to the lack of payment options.

All **sales transactions** are recorded in a format ready for export and analysis to optimize your **business intelligence**.

Engine Connect

## Get the most out of Engine

Set prices in Price Holding mode and configure Engine Connect as a master system in your vending machine: in this way you will be able to differentiate prices between cashless and cash and detect all accounting data from Engine, including sales, the number of coins in the tubes, the amount of cash in the cashbox and much more.

## Ready for Nebular

Get the best from your vending machine by taking advantage of all Cloud potentiality thanks to the native integration between Engine Connect and Nebular, our solution to offer electronic payments and connectivity in a single product.

Make your job faster and more efficient thanks to remote credit refund, stock and transactions management.

Designed by Coges, Nebular integrates naturally with your vending machine and your ERP.

Operate remotely on payment peripherals, updating parameters, firmware and database.

Act quickly if an alarm is signaled and use sales information to optimize your management.

**Nebular brings Engine Connect data directly to your ERP, on the web or in your mobile phone, in real time.**
