Cashless Payments with Smart Connectivity

Palladium Touch is an interactive cashless payment system designed for modern vending. Its 7-inch touchscreen enhances the user experience, while an integrated MyKey & MIFARE reader supports multiple payment methods.

With Ethernet and 4G connectivity options, Palladium Touch simplifies payments, online top up of media balance with credit card and mobile wallets, machine management, and customer engagement.

**Top up MyKey and Mifare with
credit card without the need for
a card reader!**

Credit on the Cloud

With Palladium Touch and Nebular, credit is securely stored in the cloud. MyKey or MIFARE acts as a unique ID, with operators maintaining full credit control.

- Real-time fraud prevention with instant credit and transaction checks
- Block lost or stolen media
- Transfer credit between media
- Instant refunds

This system ensures greater security, control, and flexibility for vending operators and users.

Palladium Touch allows you to **engage the users of your vending machine even more**, capturing their attention or entertaining them during the coffee break!

- Display advertising videos, special offers, promotional images or your company logo
- Select and upload images remotely with Nebular or by USB
- Multilingual commands
- Keypad emulation on vending machine
