Unica

The most complete cashless payment system

Unica is a high-precision 6-tube change-giver coin mechanism designed to maximize vending machine revenues. It features an integrated cashless system, a precise data audit unit, and an advanced coin validation system for reliable and efficient transactions. Programming of operating parameters is easy thanks to the new color graphic display and integrated USB ports.

Multistandard payment system

Executive, MDB and BDV protocols all in a single payment system

Choose the media you need

Available in MyKey, MIFARE and LEGIC versions with dedicated readers

Optional full-speed telemetry

Choose the 4G or WI-FI + LAN modules for real time connection to the Cloud

Unica is made in Italy and compatible with multiple currencies thanks to high-precision technology.

Vending

4 media tables
OTA updates
EVA-DTS data audit

Loyalty

Top-up and free sales bonuses
Eco-recycling
Meal vouchers

Security

Lock-ID
Blacklist
Transactions recording
Encrypted communications

Unica

What kind of cashless do you have?

Choose the closed-loop cashless reader that best suit your needs and increase the value of your vending machine. All models can be equipped with telemetry and Bluetooth expansion modules to connect to a credit card reader or to mobile applications and for additional functionality.

MyKey - MIFARE - LEGIC

Depending on the reader, Unica supports MyKey, MIFARE Classic and DESFire or LEGIC media.

Credit card

Thanks to an optional connectivity module, Unica supports contactless or chip credit card readers.

Mobile

Unica can handle smartphone payments with the Pay4Vend app or third-party apps.

Real-time coin number recognition

Unica can read in real-time the actual number of coins in the tubes. In case of manual alterations of the quantity of coins during the opening of the tube group, Unica will report any inconsistencies on the display and exportable files.

All **sales transactions** are recorded in a format ready for export and analysis to optimize your **business intelligence**.

Unica

Get the most out of Unica

Set prices in Price Holding mode and configure Unica as a master system in your vending machine: in this way you will be able to differentiate prices between cashless and cash and detect all accounting data from Unica, including sales, the number of coins in the tubes, the amount of cash in the cashbox and much more.

Ready for Vendon Cloud

Get the best from your vending machine by taking advantage of all Cloud potentiality thanks to the native integration between Unica and Vendon Cloud, our solution to offer electronic payments and connectivity in a single product.

Make your job faster and more efficient thanks to remote credit refund, stock and transactions management.

Designed by Vendon, Vendon Cloud integrates naturally with your vending machine and your ERP.

Operate remotely on payment peripherals, updating parameters, firmware and coin database.

Act quickly if an alarm is signaled and use sales information to optimize your management.

Vendon Cloud brings Unica data directly to your ERP, on the web or in your mobile phone, in real time.
