# Coges Engine

Flexible Cashless Systems for Smarter Vending Management

Coges Engine

Absolute Vending Experience

Coges Engine is a modular cashless payment system designed to adapt to every vending context — from closed environments like offices and factories to public locations with high user turnover. Built on decades of expertise, it supports a wide range of cashless media and offers full compatibility with MDB and Executive protocols.

Multistandard payment system

Executive, MDB, BDV and RS232 protocols all in a single payment system

Choose the media you need

Available in MyKey, MIFARE and LEGIC versions with dedicated readers

Full-speed telemetry

Choose the optional 4G or 4G + LAN module for connection to credit card readers

Choose the configuration that best fits your needs

Data

Model for master data audit and telemetry, without key / card reader

Base

Ideal for closed–loop environments. Supports MyKey and MIFARE transactions with basic accounting and programmable bonuses and pricing.

Plus

Adds hundreds of price lines, complete loyalty functions, complete data audit recording and other advanced functions.

coges

What type of cashless do you have?

Choose the closed-loop cashless reader that best suit your needs and increase the value of your vending machine. All models can be equipped with a 4G expansion module to connect to a credit card reader or a Bluetooth module for additional functionality.

MyKey - MIFARE - LEGIC

Depending on the reader, Coges Engine supports MyKey, MIFARE Classic and DESFire or LEGIC media.

Credit card

Combine closed-loop systems with open-loop and mobile payments

Mobile

Coges Engine handles smartphone payments with the Pay4Vend app or third-party apps.

Increase your sales chances

With multiple versions available, Coges Engine gives operators the freedom to choose the configuration that best fits their needs — whether they require basic cashless functionality or an advanced system with full telemetry and credit management in the cloud.
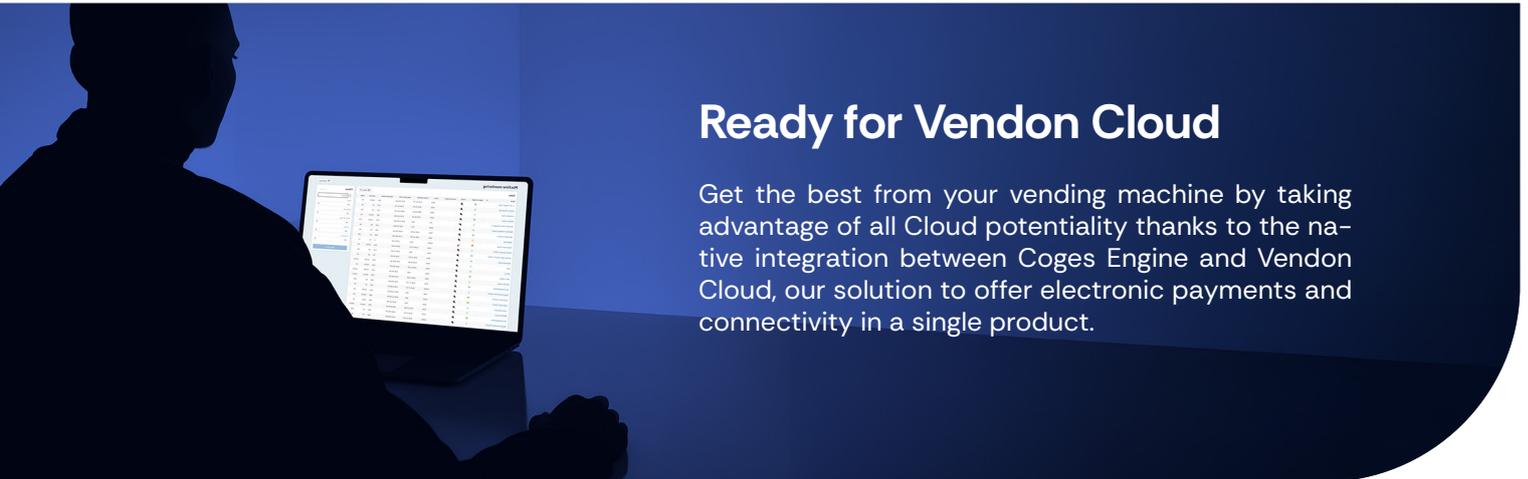

All **sales transactions** are recorded in a format ready for export and analysis to optimize your **business intelligence.**

Coges Engine
Get the most out of Engine

Set prices in Price Holding mode and configure Coges Engine as a master system in your vending machine: in this way you will be able to differentiate prices between cashless and cash and detect all accounting data from Engine, including sales, the number of coins in the tubes, the amount of cash in the cashbox and much more.

Ready for Vendon Cloud

Get the best from your vending machine by taking advantage of all Cloud potentiality thanks to the native integration between Coges Engine and Vendon Cloud, our solution to offer electronic payments and connectivity in a single product.

Make your job faster and more efficient thanks to remote credit refund, stock and transactions management.

Vendon Cloud integrates naturally with your vending machine and your ERP.

Operate remotely on payment peripherals, updating parameters, firmware and database.

Act quickly if an alarm is signaled and use sales information to optimize your management.

Nebular brings Coges Engine data directly to your ERP, on the web or in your mobile phone, in real time.
