Cloud

Take full control of your Vending and Coffee business

Monitor, analyze, and plan

Vendon Cloud is a single platform where you can monitor machines in real time, view live sales data, and manage your operations remotely.

All payment transactions, from cash to contactless and loyalty apps, are visible in one dashboard.

One platform for everything that matters

✓ Works with all vending and coffee machine brands

✓ API access for ERP, invoicing, and CRM system integration

✓ Integrated with Coges payment systems, credit card readers and mobile apps

✓ Integrated with third-party payment systems

✓ Trusted by operators across Europe for vending, OCS, and coffee services

Remote machine management

Vendon Cloud lets you manage your machines remotely:

✓ Check and adjust product prices*

✓ Update recipes or cleaning schedules*

✓ Monitor cleaning and maintenance tasks

✓ Compare coffee bean consumption vs. drinks sold to detect losses

Remote adjustments available if supported by the machine model.

Real-time data you can act on

Vendon Cloud shows you live status of every connected machine:

✓ Online/offline status

✓ Product stock and ingredient levels

✓ Technical errors and service alerts

✓ Sales transactions by payment type

✓ Temperature monitoring (with an additional sensor)

Coges payment systems: the intelligent core of your fleet.

Coges payment systems connect vending machines to the cloud, ensuring seamless data communication and multi-standard payment integration. Closed-loop cashless systems and change-giver coin mechanisms are designed for maximum compatibility and simplify machine management, transactions, and remote operations.

Advanced and accurate real-time data

⊙ Preventive maintenance

Vendon Cloud helps you maintain machine performance and avoid unnecessary repairs by tracking:

- ✓ cleaning cycles and missed routines
- ✓ blocked or worn components
- ✓ Component usage levels to plan replacements
- ✓ The complete service history of your entire fleet

⊙ Route planning and pre-kitting

Vendon Cloud helps you plan service and replenishment routes by using real-time data:

- ✓ Identify which machines need refill, service, or cash collection
- ✓ Avoid unnecessary visits and reduce fuel and labor costs
- ✓ Group machines by route and assign tasks by location
- ✓ Pre-kit machines based on actual stock and sales

⊡ Reports & analytics

Access detailed analytics on your machines, products, and customers:

- ✓ View live sales data and real-time consumption trends
- ✓ Monitor machine performance across time and location
- ✓ Detect best-sellers, underperformers, and sales patterns
- ✓ Export detailed reports for billing, accounting, or planning

$ Cash and cashless payment management

With Vendon Cloud, you can view all payments across your fleet:

- ✓ Track coin levels and get alerts for jams or validator issues
- ✓ Monitor contactless and card payments in real time
- ✓ Manage loyalty apps and closed-loop payments easily
- ✓ Detect payment discrepancies and prevent losses
- ✓ View total sales by machine, product, or payment type

Mobile app – designed to help you anywhere

☐ Vendon Cloud Mobile App

Key features:

- ✓ Monitor machine status and view live sales data
- ✓ Receive real-time alerts for errors, low stock, or cash issues
- ✓ Check product availability before visiting to a machine
- ✓ Plan restocking and maintenance routes on the go
- ✓ Assign and track tasks for field technicians
- ✓ View cleaning and maintenance history
